Where there is a "Typical" value or attribute listed anywhere in the Bulletin, or Product Specification, this is an indication only, and Fonterra Limited is not obliged to satisfy a "Typical" value so long as the product is still within specification. The MIN and MAX values set out in the Product Specification section of the Bulletin are the specification limits that Fonterra Limited agrees to meet.

Note: For Vitamins and Minerals, the MIN and MAX values set out in the Product Specification section of the Bulletin are the specification limits that Fonterra Limited agrees to meet at time of manufacture. It should also be noted that some nutrients degrade over time. The rate of degradation is affected by many factors including formulation, processing, storage conditions and packaging. Validation of this ingredient is recommended to ensure nutrients meet regulatory minimum levels at end of shelf life.

Sensory and Colour is typical at time of manufacture.
